PROJECT

Project 3 - Note App

- This is an individual Project created by me that works perfectly as a Note-making app.
- This project was developed with the help of HTML, CSS, JavaScript, and React.js.
- It is deployed on versel with the help of Github.
- not Responsive

Project 2 - Portfolio

- This is frontend single page Project
- HTML, vanilla CSS, SCSS, Javascript and Reactjs are used in this project
- Animations are inspired from few websites
- Anyone can download my resume from the downnload button
- It is deployed on versel with the help of Github.

Project 3 - Task manager

- I build the Task Manager web application as an individual project.
- HTML, CSS and React are used to build this app.
- It is deployed on versel with the help of Github.
- This app helps manage the tasks that must be done within the mentioned date.
- Not Responsive

Project 4 - Chatbot maker

- This Project is created with HTML, CSS, JAVASCRIPT with Reactjs Library
- Frontend Part is completed. It will be connected to backend soon.
- user can create mulitple folder and files of chatbots
- Npt Responsive
